

The *GIPA Act* requires government agencies (including local councils) to record and publish certain information about some contracts with private sector bodies.

Part 3, Division 5 of the *GIPA Act* states that information about contracts worth more than \$150,000 between agencies and private sector bodies must be recorded in a register of government contracts.

Contracts that must be included in the government contracts register are those:

- between an agency and a private sector contractor
- signed after 1 January 2007 or, for local councils and state-owned corporations, after the commencement of the *GIPA Act* -1 July 2010
- for a value of \$150,000 or more, and involve:
 - o the contractor undertaking a specific project such as construction, infrastructure or property development
 - o the contractor agreeing to provide specific goods or services
 - o the transfer or lease of real property.

Employment contracts do not need to be included in the register.

Class 2 contracts are class 1 contracts where:

- there has not been a public tender process and the terms and conditions of the contract have been negotiated directly with the contractor, or
- the contract was the subject of a tender (whether public or not) but the terms and conditions have been substantially negotiated with the contractor
- the obligations of one or more parties to maintain or operate infrastructure or assets
- could continue for 10 years or more, and the contract involves a privately financed project (as defined by Treasury) or the exchange of significant assets

In addition to the requirements for class 1 contracts, class 2 contracts require the following information to be entered in the register:

- particulars of any future transfer of significant assets to and from the agency
- the results of any cost-benefit analysis
- particulars of how risk will be apportioned, if relevant particulars of any significant guarantees or undertakings between the parties
- any other key elements of the contract (see section 30).

If a class 2 contract has a value, or likely value of more than \$5 million, it becomes a class 3 contract.
